

**HOLDEN**

**Your primary school students will go better with a Holden mentor.**

**Would you like access to an industry expert to talk about:**

- vehicle design,
- aerodynamics,
- vehicle handling,
- the impact of vehicles on the environment, or
- alternative energy sources?

**Well here is your chance!!!**

In a new initiative for 2010, **Holden** has a team of mentors ready to support primary school teams entered in the HPV A Class for the 2010 RACV Energy Breakthrough.

It's a great opportunity for your school to develop a mentorship with an industry leader from **Holden** and for your students to hear what industry experts are saying about the future of personal transportation and the environment.

**How will it work?**

**Holden** mentors will communicate with HPV A teams face to face, and via e-mail and/or telephone. **Holden** mentors and school teams may have regular communication throughout terms 2, 3 & 4 in the lead up to the RACV Energy Breakthrough in November.

These conversations and discussions will help prepare teams for the event, particularly the Design & Construction and Display & Presentation components.

**How do we apply?**

If your school is entered in the HPV A category of the Breakthrough all you have to do is get a teacher from your school to complete an online Expression of Interest form.

The RACV Energy Breakthrough team will then arrange for a **Holden** mentor to make contact with you.

Applications open via the RACV Energy Breakthrough website on Monday, May 17, 2010.

**Further Information**

If you would like more information about the **Holden** mentor program please email us at [breakthrough@cgoldshire.vic.gov.au](mailto:breakthrough@cgoldshire.vic.gov.au).
